

BDTB18 – Industrial temperature gauge, bimetallic

Product description

Badotherm thermometer model BDTB18 is available in 63 to 160 mm diameter. The BDTB18 is available with various connections, such as: fixed stem on back, bottom, or every angle connection. These bimetal thermometers are suitable for corrosive media and environments in chemical process, petroleum, and food industries.

Design standard

EN 13190

Dial sizes, ranges & accuracy

There are 3 dial sizes available for the bimetal temperature gauge. Both gauges have the same ranges and accuracy. Accuracy class is based on dry gauges at 23°C +/-10°C ambient temperature.

Dial size	Scale ranges	Accuracy class
63mm	Various ranges between -20 °C and +600 °C ¹	Class 1.0
100mm		
160mm		

¹) standard range temperature delta: 60, 80, 100, 120, 140, 160, 200, 250, 300, 400, 500 and 600 °C

Mounting variation

For the BDTB18 series the mounting variations are below.

- **type A** (01) bottom connection, direct mounting
- **type D** (03) center back connection, direct mounting

Versions of stem mounting

Depending on the process different versions of mounting the stem (bulb) to the case. The versions are:

- **Fixed**; the stem is directly welded to the case
- **Every angle**; the stem is fixed with an adjustable device

Process connection type

The process connection type can be selected freely. There are several options. Threaded option can be selected in multiple thread standards

- **Plain**; stem without thread
- **Fixed**; Thread fixed to the stem by welding
- **Adjustable**; thread adjustable by compression fitting
- **Rotatable (union) nut**; Female thread on fixed position
- **Rotatable (loose) nut**; Male thread on fixed position

Materials of construction

	BDTB18
Case	AISI 304
Bezel	AISI 304
Connection ¹	AISI 316
Stem ¹	TP316
Movement	Stainless steel
Pointer	Aluminium
Dial	Aluminium
Window gasket	NBR
Fill plug	NBR (HNBR for filled gauges)
Window	glass

¹) wetted materials

Process connection size

Process connections of the BDTB temperature gauges are available in different sizes and types.

ISO 228-1	ISO 7-1	ANSI 1.20.1	DIN 13-1
G ¼ (A)	R ¼ (A)	¼" NPT	M14x1.5
G ⅜ (A)	R ⅜ (A)	⅜" NPT	M18x1.5
G ½ (A) ◀	R ½ (A)	½" NPT	M20x1.5
G ¾ (A)	R ¾ (A)	¾" NPT	M27x2

The small size threads (1/4" and M14) are only possible with 6mm stem. For both female and male there can be restriction per type of process connection.

-> See datasheet "thread information" for specific thread details

Working range limitations

The gauges are built to withstand harsh environments however the EN 13190 limits the use of a temperature gauge according below table.

Continuous temperature load	Measuring range acc EN 13190
Short time (<1hr)	1.1x measuring range

Temperature limitations

The gauges can withstand ambient and storage temperature up to a certain limit. The limitations on temperature on the case are:

	Ambient	Storage
Dry case	-40°C ...+60°C	-40°C ...+70°C

Pressure limitations

The gauges can withstand a process static pressure of **25 bar** on the stem. Above these pressure it is advised to use a thermowell from our BDTW series.

Window

Standard BDTB18 gauges have a glass window with option a laminated safety window.

Pointer

Standard pointer is a fixed black painted aluminum pointer.

Dial facing

The dial plate is made from aluminum and coated with UV resistant white coating. The black dial markings, scale, numbering, and interval is according the EN 13190. Options like rotated dial, colored dial, customer logo, or colored segments are possible as well. Scale interval and numbering is following the EN 13190.

Degree of protection

The BDTB18 has a standard degree of protection of IP65. The values are determined according the IEC/EN 60529. Class IP67 is available as option.

Zero adjustment

The BDTB18 100mm and 160mm has a standard zero adjustment screw on the back of the case. This allows a correction of +/- 4%.

Case filling

The gauges cannot be case filled because of the open stem construction. The axle from the bimetal spring is directly led into the case. Filling with fluid will lead to pressure rising inside the case or boiling of the fill fluid. For case filled execution refer to the BDTG series.

Certification & Declaration

Calibration

Gauges are full range calibrated as a factory standard. Optionally you can select a 5 points calibration certificate.

[ATEX 114 - 2014/68/EU](#)

ATEX restrictions are explained in the IOM and in the ATEX background datasheet.

[EN 10204 material certificate](#)

A material 3.1 certificate on the wetted parts can be supplied.

Standards used

Design Standards

Standard	Description
EN 13190	Dial thermometers

Material Standards

Standard	Description
NACE MR0175/MR0103 ISO 15156 - 2020	use in H ₂ S-containing environments in oil and gas production
NORSOK M-630 - 2010	specification for use in pipelines
ASTM standards	Material specific standards

Certification Standards

Standard	Description
EN 10204 - 2017	Inspection documents
ATEX 114 - 2014/68/EU	Equipment for potentially explosive atmospheres

Error limit

The scale range and measuring range are determining the allowed error limit for the temperature gauge. The error limits are according the EN 13190 and in °C. Only class 1 error limits are mentioned as Badotherm do not make class 2 temperature gauges.

Scale Range (°C)	Measuring range (°C)	Class 1 (°C)
-20 + 40	-10 + 30	1
-20 + 50	-10 + 40	
-20 + 60	-10 + 50	
-20 + 80	-10 + 70	
-20 + 100	-10 + 90	2
-20 + 120	-10 + 110	
-20 + 140	-10 + 130	
-25 + 40	-15 + 30	
-30 + 50	-20 + 40	1
-30 + 70	-20 + 60	2
-30 + 100	-20 + 90	
0 + 60	10 + 50	1
0 + 80	10 + 70	
0 + 100	10 + 90	
0 + 120	10 + 110	
0 + 150	10 + 130	2
0 + 160	20 + 140	
0 + 200	20 + 180	
0 + 250	30 + 220	
0 + 300	30 + 270	2.5
0 + 350	50 + 300	
0 + 400	50 + 350	
0 + 450	50 + 400	
0 + 500	50 + 450	
0 + 550	50 + 500	
0 + 600	100 + 500	10
50 + 650	150 + 550	
0 + 650	10 + 550	

Minimum immersion length (L1)

For accurate measurement it is important to have the full sensing element immersed in the process or thermowell. The minimum immersion length in below table is taking this into account.

Scale Range (°C)	Measuring range (°C)	BDTB	BDTB DA
-20 + 40	-10 + 30	100	100
-20 + 50	-10 + 40	80	
-20 + 60	-10 + 50	63	
-20 + 80	-10 + 70		
-20 + 100	-10 + 90		
-20 + 120	-10 + 110		
-20 + 140	-10 + 130	80	
-25 + 40	-15 + 30	63	
-30 + 50	-20 + 40	80	
-30 + 70	-20 + 60	63	
-30 + 100	-20 + 90	80	
0 + 60	0 + 50	100	
0 + 80	0 + 70	63	
0 + 100	0 + 90		
0 + 120	20 + 110		
0 + 150	20 + 130		
0 + 160	20 + 140		
0 + 200	20 + 180		
0 + 250	30 + 220	150	
0 + 300	30 + 270		
0 + 350	50 + 300		
0 + 400	50 + 350		
0 + 450	50 + 400		
0 + 500	50 + 450		
0 + 550	50 + 500		
0 + 600	100 + 500		
50 + 650	150 + 550		
0 + 650	100 + 550		

Stem diameters (S1)

Stem diameters are divided in metric and imperial tube sizes. Other tube sizes then these can be supplied on request.

Metric sizes	Imperial sizes
6mm	¼" (6.35)
8mm	3/8" (9.53)
10mm	½" (12.7)
12mm	

Dimensions table

Type A ; Fixed

Dial size	d	d1	L	h	S1
63	68.6	63.0	15.7	57.0	variable
100	110.5	100.5	21.2	78.0
