

■ **DESCRIPTION**

Use the Blanking Cap 500 on unused quick disconnect plugs to avoid vacuum loss from your system. It has a domed end which fits in the palm of the hand making it easier to push into place on plugs.

■ **BENEFITS**

- Cap unused connections in the autoclave to stop air pressure leakage into the vacuum system.
- Protect vacuum valve connections during tool transit.
- Prevent vacuum valve leakage during vacuum drop tests.

■ **TECHNICAL DATA**

Construction	Single piece solid body
Material type	Stainless steel
Material type of O ring seals	FKM elastomer
Service temperature	246°C
Coupling style	Hansen ISO-B
Coupling size	1/4 inch
Max autoclave pressure	10 bar
